CLIMATE CHANGE

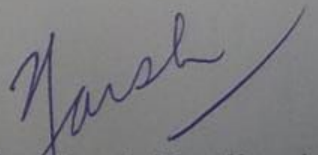

MESSAGE

As world progresses globally towards eco-friendly materials and technologies, India is taking a major role in this environment friendly transition. Development of cold chain network across the country will have positive impact on export of horticultural and agricultural produce. This shall also have significant environmental benefit in reducing emissions through food loss. An effective cold chain reduces transit time, and enhances customer services.

REFCOLD is an exclusive exhibition on Refrigeration and cold chain equipment organized with the objective to bring forward best technology in cold chain sector and leading to overall growth of the sector. REFCOLD is making an effort of creating robust cold chain infrastructure and eventually contribute towards the goal of Doubling Farmers Income by 2022. REFCOLD -2018 is being organized by Indian society of Heating Refrigeration and Air-Conditioning Engineers (ISHRAE) and Nurnberg Messe India.

My best wishes are with the entire team organizing REFCOLD and to everyone who is participating in REFCOLD India 2018. I believe that this is going to be a very successful event.

Date: 30.10.2018

(Dr. Harsh Vardhan)
