### MESSAGE

Our visionary **Hon. Prime Minister** has introduced many programs which can benefit the industrial professionals as well as the citizens of the country.

His vision for **doubling farmers' income by the year 2022**, is one such dream, for which, various schemes of Agriculture Sector including Cold chain are being promoted by the Government.

From the distant rural farms to the urban centers, the journey of farm produce through an efficient & quality food supply infrastructure is key to India's Food Security for its more than one billion Citizens. To build this infrastructure, we need the cooperation of professionals and experts of this segment for better solutions.

I am happy to note that The Indian Society of Heating, Refrigerating and Air Conditioning Engineers (ISHRAE), alongside Gobananas as Co-Reach Partner & NurnBerg Messe as Co-Organizer, has come up with, the first ever show focusing on Cold Storages & Mobile Refrigeration, "**REFCOLD INDIA**". The event to be held during 22<sup>nd</sup> - 24<sup>th</sup> November, 2018, at Mahatma Mandir Convention cum Exhibition Centre, Gandhinagar, Gujarat, already being supported by NCCD & International Associations from Turkey, China and Australia, should witness unprecedented participation from all stakeholders of this sector.

I think the event will provide a good platform to share and explore new opportunities and innovations to all the stake holders.

I extend my congratulations for organizing **REFCOLD INDIA 2018** and my best wishes for all the success of the event.

(Narendra Singh Tomar)
